<b>Tools and Frameworks:</b>	Jupyter, Visual Studio, Git-hub, Express.Js & Figma
<b>Video-Editing:</b>	Adobe Premier Pro

## PROJECTS

---

**Home-Rent-Tracker.** Built a payment page.We have used React.Js, Node.Js, Tailwind Css, and Back-End in this project.In this project, we thought of creating an online payment page and our renters can access the complete payment history and electric bill records from within it. I and my brother and I have made this project because we have renters at home, after seeing the problem of their or our payments, we came up with the idea that we should make this type of project. Git-Hub! ([GIT-HUB](#))

**Random-gif generator** We have used React.Js, Node.Js, Tailwind Css, and API in this project. In this you can generate any random gif or you can also search as per your choice

There are more projects which you can see by going to my GitHub. ([GIT-HUB](#))
